

RELICRAID is one word with two meanings.....

RELIC: The object left behind. Each RELIC is unique because each is individually coded. They may look the same but they definitely are NOT the same.

RAID: The action of searching for a RELIC using the purchased clue packs. EACH RAID is different because EACH clue pack to the location of the RELIC will be different.

Each Raid is independent of any other RAID. Meaning, you, the player, are competing against a limited amount of other players. 100 players per RAID is the maximum amount. Your odds are obviously at least 1 in 100. Your odds are actually dependent upon your efforts!
